

COSMETIC *Ingredients*

BECAUSE BEAUTY IS EMOTION, WE
DEVELOP COSMETIC INGREDIENTS
WITH THE HIGHEST QUALITY AND
PERFORMANCE TO BRING
SENSORIAL EXPERIENCE.

Sensient Cosmetic Technologies

is committed to developing, producing and marketing high-quality ingredients and colorants for the cosmetic industry. Our global production facilities provide cosmetic companies around the world with a wide range of products for make-up, skin care, hair care, personal hygiene, oral care and fragrance applications. In partnership with our customers we constantly care about offering a global service through:

- Consistent quality to all manufactured products
- Regulatory support
- Usage limits and labelling requirements
- Technical expertise and advice through innovative laboratory trials
- Fast and courteous customer service

We support and solve our customers' needs with innovation, technical expertise and formulations development.

EXPERTISE IN COSMETIC INGREDIENTS

Innovation

To satisfy our customer needs, Sensient Cosmetic Technologies has established a strong and global innovation program for skin care, hair care and make-up products.

Our R&D specialists are constantly bringing new concepts to the market either by developing state of the art ingredients or revolutionary formulations.

Green inspiration by Sensient

Our products are developed with a conscientious selection of raw materials and suppliers. Focusing on green solutions, we reinforce our portfolio with natural based products which are Ecocert and Cosmos compliant.

Our specially developed references driven by the Green inspiration

Globally but locally adapted approach

Our leading-edge technical services team is supported by global research centers, but our members work in local markets to provide customized product solutions and technical support. Sensient's global resources and world-class manufacturing facilities help our customers achieve greater supply-chain agility and security.

Applications

Sensient's ingredients are suitable for a large range of applications in make-up, skin care, hair care, toiletries, oral care and fragrance. The line provides technical as well as cosmetic benefits, such as outstanding textures, optical effects and functional properties.

Regulatory

The entire portfolio is developed following the highest purity standards. The range meets the specific cautions of all global regulations including restrictions for eye and lip make-up products as defined by local regulations.

Please contact our sales team to get more information about our range of cosmetic ingredients.

The group of products presented in this brochure will enable the user to obtain the best possible results from the standpoint of tints and general suggested use. However, we would recommend that users of our products carry out all necessary tests to determine their suitability for use in a given formulation.

Solubilizers

SOLUBILIZERS

SOLUBILISANT LRI®

INCI name : PPG-26 Buteth-26 (and) PEG-40 Hydrogenated Castor Oil (and) Water

Unique surfactant blend designed to enable water to be used as a substitute for alcohol in many cosmetic and perfumery products

Non ionic solubilizer

Solubilizer for perfume concentrates, essential oils, vitamins and other oily ingredients of alcohol-free cosmetics

Perfect HLB for microemulsions

Minimize stickiness, foaming, irritation and quantity to be used

NATPURE® SOL

INCI name : Glycerin (and) Sucrose Laurate (and) Sucrose Dilaurate (and) Sucrose Trilaurate (and) Hydrogenated Starch Hydrolysate

Synergistic combination between natural sucrose and fatty acid esters of vegetable origin.

Natural

Green label Ecocert compliant (COSMOS in progress)

Easy to use & easy to process

Preservative free

Color & Fragrance Protectors

COLOR
PROTECTION

As a premium dye and pigment manufacturer, Sensient Cosmetic Technologies developed specific protecting agents for color and fragrances for cosmetic formulations. The Covabsorb range - patented technology - provides perfect protection to all perfumes, personal and skin care applications.

SENSISORB® CF+

INCI Name : Benzotriazolyl Dodecyl P-Cresol (and) Butylphthalimide (and) Isopropylphthalimide (and) Ethylhexyl Salicylate (and) Butyl Methoxydibenzoylmethane

Superior color and fragrance protection against fading in fine fragrances and cosmetic products

Patented composition of organic UV-A, UV-B and UV-C filters

COVABSORB®

INCI Name : Ethylhexyl Methoxycinnamate (and) Butyl Methoxydibenzoylmethane (and) Ethylhexyl Salicylate

Color and fragrance protection against fading in alcohol and hydro-alcohol bases

Patented composition of organic UV-A, UV-B and UV-C filters

COVABSORB® EW

INCI Name : Ethylhexyl Methoxycinnamate (and) Butyl Methoxydibenzoylmethane (and) PPG-26 Buteth-26 (and) Ethylhexyl Salicylate (and) PEG-40 Hydrogenated Castor Oil

Color and fragrance protection against fading in aqueous formulations

Optimized water-soluble blend of organic UV-A, UV-B and UV-C filters

COVABSORB® DS

INCI Name : Ethylhexyl Salicylate (and) Butyl Methoxydibenzoylmethane (and) Diethylhexyl Syringylidenemalonate

Color and fragrance protection against fading in water bases

Patented composition of organic UV-A, UV-B and UV-C filters

Mineral UV filters

A complete range of advanced mineral UV filters to address sun care formulation challenges. Keeping transparency upon application with no compromise on SPF efficiency, these products, based on innovative technologies are available either in powder form, with or without surface treatments, or in dispersion.

• Pigments •

UVR TiO₂

INCI Name : Titanium Dioxide
Ultrafine rutile titanium dioxide for high sunscreen performance

OXYDE DE ZINC
MICROPUR

INCI Name : Zinc Oxide
Ultrafine zinc oxide mineral UV-A, UV-B, UV-C filters

UVR TiO₂ AS

INCI Name : Titanium Dioxide (and) Triethoxycaprylsilane
AS Treated - ultrafine rutile titanium dioxide for high sunscreen performance
Hydrophobic properties

OXYDE DE ZINC
MICROPUR AS

INCI Name : Zinc Oxide (and) Triethoxycaprylsilane
AS Treated - ultrafine zinc oxide mineral UV-A, UV-B, UV-C filters
Hydrophobic properties

• Dispersions •

NATPURE®
SCREEN TWG

INCI Name : Titanium Dioxide [nano] (and) Glycerin (and) Aqua (and) Propanediol (and) Phytic Acid (and) Sodium Hydroxide
Water-based sunscreen dispersion with a high content of nano titanium dioxide
Remarkable UV absorbance with no compromise on transparency upon application

COVASCREEN®
TI AS D56

INCI Name : Titanium Dioxide [nano] (and) Cyclopentasiloxane (and) Cyclohexasiloxane (and) Lauryl Polyglyceryl-3-Polydimethylsiloxyethyl (and) Dimethicone (and) Triethoxycaprylsilane
Advanced dispersion of stabilized mineral sunscreens with nano titanium dioxide
Very light and non-greasy skin feeling

COVASCREEN®
ZN AS D56

INCI Name : Zinc Oxide [nano] (and) Cyclopentasiloxane (and) Cyclohexasiloxane (and) PEG-10 Dimethicone (and) Lauryl Polyglyceryl-3-Polydimethylsiloxyethyl (and) Dimethicone (and) Triethoxycaprylsilane
Advanced dispersion of stabilized mineral sunscreens with nano zinc oxide
Very light and non-greasy skin feeling

COVASCREEN®
WTI

INCI Name : Titanium Dioxide (and) Aqua (and) Glycerin (and) Alumina (and) Sodium polyacrylate (and) Tetrasodium EDTA (and) Silica (and) Sodium Polyphosphate (and) Phenoxyethanol
Aqueous dispersion of alumina coated with nanofine rutile TiO₂

COVASCREEN®
ZN

INCI Name : Zinc Oxide (and) Hydrogenated Polyisobutene (and) Trimethoxycaprylsilane (and) Hydrogenated Castor Oil Hydroxystearate (and) PPG-5-ceteth-10 Phosphate
Advanced dispersion of nanofine ZnO

Thickeners

Going beyond the simple adjustment of viscosity, modern thickeners can deeply transform a texture to create unexpected experiences for consumers. Discover Sensient Cosmetic Technologies' Covacryl range : sensorial thickeners with optimized properties allowing to create a wide range of effects. Freshness, softness, lubricant, quick break, light texture, mousse are some examples of trendy effects provided by Covacryl products in final formulations.

Water soluble thickeners – Synthetic

Water soluble thickeners – Natural

Oil soluble thickeners

Sensory driven research

A wide range from natural to synthetic sensorial thickeners

Innovative concept patented by Sensient Cosmetic Technologies :

Cream in powder form and Instant emulsion formulations

Sensory analysis expertise : new data constantly generated on our range of texturing agents

Covacryl MV60 : unique effects in versatile applications fo sensory enhancement

Incredible tool for the formulator: extra dimensions are given to cosmetic products

• Water thickeners - Synthetic •

INCI Name : Polyacrylic Acid
Slightly crosslinked polyacrylate
Quick break effect

INCI Name : Sodium Polyacrylate
Linear polyacrylate
Stringy non sticky texture

INCI Name : Sodium Polyacrylate
Slightly crosslinked polyacrylate
Improves stability of emulsion

INCI Name : Sodium Polyacryloyldimethyl Taurate
(and) Sodium Polyacrylate
Linear polyacrylate
Stringy non sticky texture
High water holding capacity
High viscosity and strong adhesion properties
without residue

A unique hydrophilic sensorial modifier
to play with textures

INCI Name : Sodium Polyacrylate
Crosslinked polyacrylate
No film
Frozen gel aspect
Light diffusing, transparent and mat

Gourmet texture

Rich texture, bouncing pick-up, a velvet skin feel and no stickiness
Exceptional powdery and smooth feeling

Light texture

Comfortable light texture, non greasy, matte, non sticky and velvet
Ideal for cosmetics for men

Frosted gel

Frozen gel aspect
Very powdery skin feel

Mousse texture

• Water thickeners - Natural •

INCI Name : Cichorium Intybus Extract
100% natural thickener derived from chicory
Highly thixotropic
White opaque gel
Excellent dispersing agent for pigments
Fat-like texture
Moisturizing effect

INCI Name : Microcrystalline Cellulose (and) Cellulose Gum
Natural colloidal fluid thickener
Low thixotropy
Excellent suspending properties
Ideal for spray, milk and serum products

INCI Name : Xanthane Gum (and) Hectorite (and) Cellulose
Thixotropic hydrophilic thickening complex
Transparent elastic gel
Lubricant and soft feeling
Good suspending and stabilizing properties

INCI Name : Microcrystalline Cellulose (and) Cellulose gum
Thixotropic colloidal thickener derived from natural renewable sources
Cream viscosity
Good suspending and stabilizing properties
Color changing O/W emulsions

INCI Name : Sodium Carboxymethyl Starch
Natural instant thickener derived from potatoe
Homogenous film
Translucide gel
Instant gelling effect

Two innovative patented concepts by Sensient Cosmetic Technologies :
Instant emulsion : Espresso
Cream in powder form

COVAGEL

• Oil thickeners •

INCI Name : Silica Dimethyl Silylate
Hydrophobic fumed silica
Clear oily thixotropic gel
For W/O emulsions

INCI Name : Mica
Natural mica with oil thickener properties.
High transparency
Mattifying effect
Soft and slightly creamy feeling

INCI Name : Magnesium (and) Potassium (and) Silicon (and) Fluoride (and) Hydroxide (and) Oxide
Oil thickener providing slight coverage on the skin
Mattifying effect
Soft feeling

INCI Name : Magnesium (and) Potassium (and) Silicon (and) Fluoride (and) Hydroxide (and) Oxide
Oil thickener keeping transparency on the skin
Mattifying effect
Soft and slightly creamy feeling

Fibers

Depending on their composition, length and thickness, fibers are used to bring volume and length in mascara, soft focus effect in skin care application or densifying properties in eyebrow or hair care formula. The natural and synthetic fibers of the Fiberlon range were designed to create dramatic effects upon application.

• Synthetic fibers •

FIBERLON®
361 T
White fibers

INCI Name : Nylon-6
Transparent and triangular
Volume and long lash effects
Shiny results

FIBERLON®
931-D1-S
White fibers

INCI Name : Nylon-6,6
Opaque and round
Volume and curly properties
Soft focus effect

FIBERLON®
362 T
White fibers

INCI Name : Nylon-6
Transparent and triangular
Volume and very long lash effects
Shiny results

FIBERLON®
102 DC B2
Black fibers

INCI Name : Nylon-6 (and) Silica
(and) CI77266 [D&C Black n°2]
Black and triangular
Deep and intense black color
Long lash properties
No bleeding

• Natural fibers •

NATPURE®
FIBER SF 50
Sunflower

INCI Name : Cellulose (and) Pectin (and)
Aqua (and) Hydrolyzed Vegetable Protein
Soft focus effect
High water and oil absorption capacity
Smooth the appearance of fine lines
High coverage

NATPURE®
FIBER HS 50
Hemp

INCI Name : Cellulose (and) Pectin (and)
Aqua (and) Hydrolyzed Vegetable Protein
High soft focus effect
High water and oil absorption capacity
Smooth the appearance of fine lines
Good coverage

FIBERLON®
AC
Cellulose

INCI Name : Cellulose
Opaque and round
Volume and long lash effects

NATPURE®
FIBER HS 100
Hemp

INCI Name : Cellulose (and) Pectin (and)
Aqua (and) Hydrolyzed Vegetable Protein
Soft focus effect
High water and oil absorption capacity
Smooth the appearance of fine lines
Good coverage

Film-formers

Recognizing the growing challenges for formulators to create innovative textures, Sensient Cosmetic Technologies keeps increasing its offering of film formers to create unique, pleasant and surprising beauty products.

Synthetic film-formers

Covacryl® acrylic film formers are water-soluble polymers that can create films with a wide range of properties, from flexibility to non-transfer or improved coverage of eye-lashes. When used in mascaras, these film former can provide adjusted elasticity, shininess, suppleness, dryness depending on the grade of Covacryl® used in the formulation.

Natural film-formers

As a result of our focus on the environmental impact of cosmetics and of our strong focus on "Green" ingredients, the Natpure® range of film formers was developed to provide natural solutions to formulators.

• Synthetic film-former •

Curling properties
if mixing these
two...

COVACRYL®
E14 WP

INCI Name : Acrylates Copolymer
(and) Aqua
30% Active matter / Tg : 44 °C

Transparent white to hazy gel
Hard, semi-matte and
transparent film
Curl retention
long lasting properties
Paraben-free

COVACRYL®
A15 WP

INCI Name : Acrylates Copolymer
(and) Aqua
30% Active matter / Tg : 28 °C

Transparent non-colored gel
Water resistant film former
Paraben-free
Shiny transparent film,
curl retention

Very
flexible

COVACRYL®
P12

INCI Name : Acrylates Copolymer
30% Active matter / Tg : -7 °C

Transparent non-colored gel
Supple, elastic,
transparent film

COVACRYL®
MS11 WP

INCI Name : Acrylates Copolymer
(and) Aqua
55% Active matter / Tg : 0 °C

The best for
water resistance !

White with sometimes
interference color
Flexible transparent film
Long lasting properties
Paraben-free

The most flexible !
Suitable for
tubing effect

COVACRYL®
MT10

INCI Name : Acrylates/Ethylhexyl
Acrylate Copolymer (and)
Laureth-50 (and) Aqua
50% Active matter / Tg : -10 °C

White gel
Verry supple and
stretchable transparent film

• Natural film-former •

NATPURE® FILM AP

INCI Name : Pullulan (and) Sorbitol
(and) Trehalose (and) Accacia Gum

Natural sugar-based film former coated with accacia gum
Very flexible, elastic and
transparent film
Compatible with vibrating or rotating mascara

NATPURE® FILM PR

INCI Name : Pentaerythrityl Rosinate (and) Aqua
[Water] (and) Lauryl Glucoside (and) Sodium
Sulfonate Stearic Acid*
*pending PCPC registration
50% Active matter / Tg : 4 °C

NATPURE® FILM GR

INCI Name : Glyceryl Rosinate (and) Aqua [Water]
(and) Cellulose (and) Sodium Sulfate
47% Active matter / Tg : 6 °C

Natural film former based on pine tree origin

Water resistant

No transfer

Resistance to sebum

Resistance to shear

Very shiny results with Natpure® Film PR

Sensory Powders

With today's consumers, it's all about the experience! An engaging sensorial experience will involve as many senses as touch, sight and smell. The sense of touch is extremely important from the pick-up of the product until well after total absorption with after-feel left on the skin.

Beads

Micro-spherical powders are often used as feel enhancers in make-up and skin care applications. The sensorial experience of these fillers are driven by the shape, size and chemical nature of the beads. These characteristics are also key to provide specific optical effects to cosmetic products which drive as well the needs of the beauty industry.

Lamellar Particles

We have created a broad range of lamellar powders to address key formulation needs when it comes to creation unique and revolutionary textures. These ingredients allow the formulation of outstanding textures by providing unique slip effects. Combined with our surface treatment expertise, these particles will take your formulation to the next sensorial level.

Composites

Master the light thanks to our range of composite to achieve an optimum result on the skin, hiding imperfections and wrinkles. Thanks to innovative technology, creating matte, illuminating or soft focus are now easy with ready to use powders.

COVABEAD® PMMA 2 MUSI

INCI Name : Methyl Methacrylate
Crosspolymer (and) Silica
Slip effect
Soft feeling
Soft focus effect optimized when low pigments load

COVABEAD® PMMA

INCI Name : Polymethyl Methacrylate
Smooth effect
Transparency
Fluidity and lubricity for emulsions and powder

COVABEAD® VELVET 10

INCI Name : Polymethyl Methacrylate
Perfectly monodisperse
Velvet touch
Creamy feeling
Soft focus & Luminous glow

COVABEAD® VELVET 20

INCI Name : Polymethyl Methacrylate
Perfectly monodisperse
Velvet touch
Ball bearing effect
Soft focus & Luminous glow

COVABEAD® CRYSTAL

INCI Name : Calcium Sodium Borosilicate
Mineral origin
Low lightening power : deep intense shade
Blurring effect
Ball bearing effect
Smoothness

SENSIBEAD® SI 320

INCI Name : Silica
Mattifying effect
Oil and water absorption
Softness

SENSIBEAD® SI 175

INCI Name : Silica
Mattifying effect
Oil and water absorption
Slip effect
Very thin deposition
Ball bearing effect

BEADS

Transparent
spherical glass

Plain spherical
ultrafine

Plain spherical
ultrafine
monodispersed

Porous spherical
ultrafine

COVABEAD® LH 85

INCI Name : Methyl Methacrylate Crosspolymer
Improved slip
Dry feeling
Oil and water absorption
Soft focus & Mattifying effect

COVABEAD® LH 170

INCI Name : Methyl Methacrylate Crosspolymer
Slip effect
Dry and creamy skin feel
High oil and water absorption
Soft focus & Mattifying effect

INCI Name : Titanium dioxide (and)
Aluminum Hydroxide
Pigment composite
Superior soft focus effect
Skin-tone adapting make-up
Mattifying effect
Available with AS surface treatment

MATLAKE OPA

COMPOSITES

COVAMAT

INCI Name : Mica (and) Talc (and)
Titanium Dioxide (and) Lauroyl Lysine
Transparency and matte appearance
Modulates the light
Corrects face's imperfections

COVALUMINE® AS

INCI Name : Alumina (and) Triethoxycaprylylsilane
Alumina platelets coated with Alkyl Silane
Blurring effect
Skin glow
High transparency
Soft skin feel

LUMIRAL

INCI Name : Mica (and) Iron Oxides (and) Titanium Dioxide
Optimized blend of mineral powders and pigments
Photoreflector : correct light reflection
Shine control
Softness

TALC LCW

INCI Name : Talc
Small particle size
Silky feeling
High Transparency
Available with AS, FHP,
HLC, surface treatments

SERICITE 300 S

INCI Name : Mica
Natural mica with soft and
creamy feeling
Excellent blurring effect
Good spreadability and
transparency

STAR MICA 33

INCI Name : Synthetic Fluorophlogopite
Superior transparency
Pearly effect

SENSIFEEL STAR SOFT

INCI Name : Magnesium (and)
Potassium (and) Silicon (and)
Fluoride (and) Hydroxide (and)
Oxide
Synthetic mica with unique soft
and creamy feeling
Good sliding and
homogeneous deposition thanks
to thin platelets
Uniforme radiance result

MICA 8 R2041

INCI Name : Mica
Silky touch
Pearly effect
Available with FHP surface treatment

STAR MICA 23

INCI Name : Synthetic Fluorophlogopite
Superior transparency
White and satinated effect

SERICA 5

INCI Name : Mica
Semi-transparent powder
Creamy feeling
Satinated effect

AMIDON DE MAÏS MST

INCI Name : Zea Mays Starch
Natural corn starch powder
Natural filler
Absorb excess of perspiration

COVASNOW 27

INCI Name : PTFE
Not irradiated platelets
Cottony, snow-like texture
Soft, and creamy skin feel
Excellent spreadability
Good compressibility and high resistance to drop tests
Highly hydrophobic

COVAFLUID AMD

INCI Name : Aluminum Starch Octenyl Succinate
Hydrophobic modified corn starch powder
Absorb excess of sebum
Superior coverage
Good spreadability
Long lasting effect
Velvet touch

ALUMINA

ALUMINA AS-EM : AS treated Alumina
INCI Name : Aluminum hydroxide (and) Triethoxycaprylylsilane
Key component for water-based cream in powder form

CARBOMAT

INCI Name : Calcium Carbonate
Natural lamellar powder
Good slip
Dry skin feel
Use to formulate emulsions for greasy skins
Natural matte effect to get molded powders

ALUMINE FHP-EM : FHP treated Alumina
INCI Name : Aluminum hydroxide (and) Ammonium C6-16
Perfluoroalkylethyl Phosphate
Key component for oil-based cream in powder form

Bases & Additives

Positioned as a global cosmetic ingredients supplier, Sensient Cosmetic Technologies offers a range of bases and additives which can be used in skin care, hair care and make-up products.

These texturing agents help formulate lipsticks, emulsions, powders while providing sensory properties such as shininess, softness, transparency ...

Lipstick bases & additives

Going beyond the color of lip make-up products, consumers are looking for shininess, glossy or matte effect. The sensorial perception during and after application on the lips is directly linked to the texturing ingredients used in the formulation.

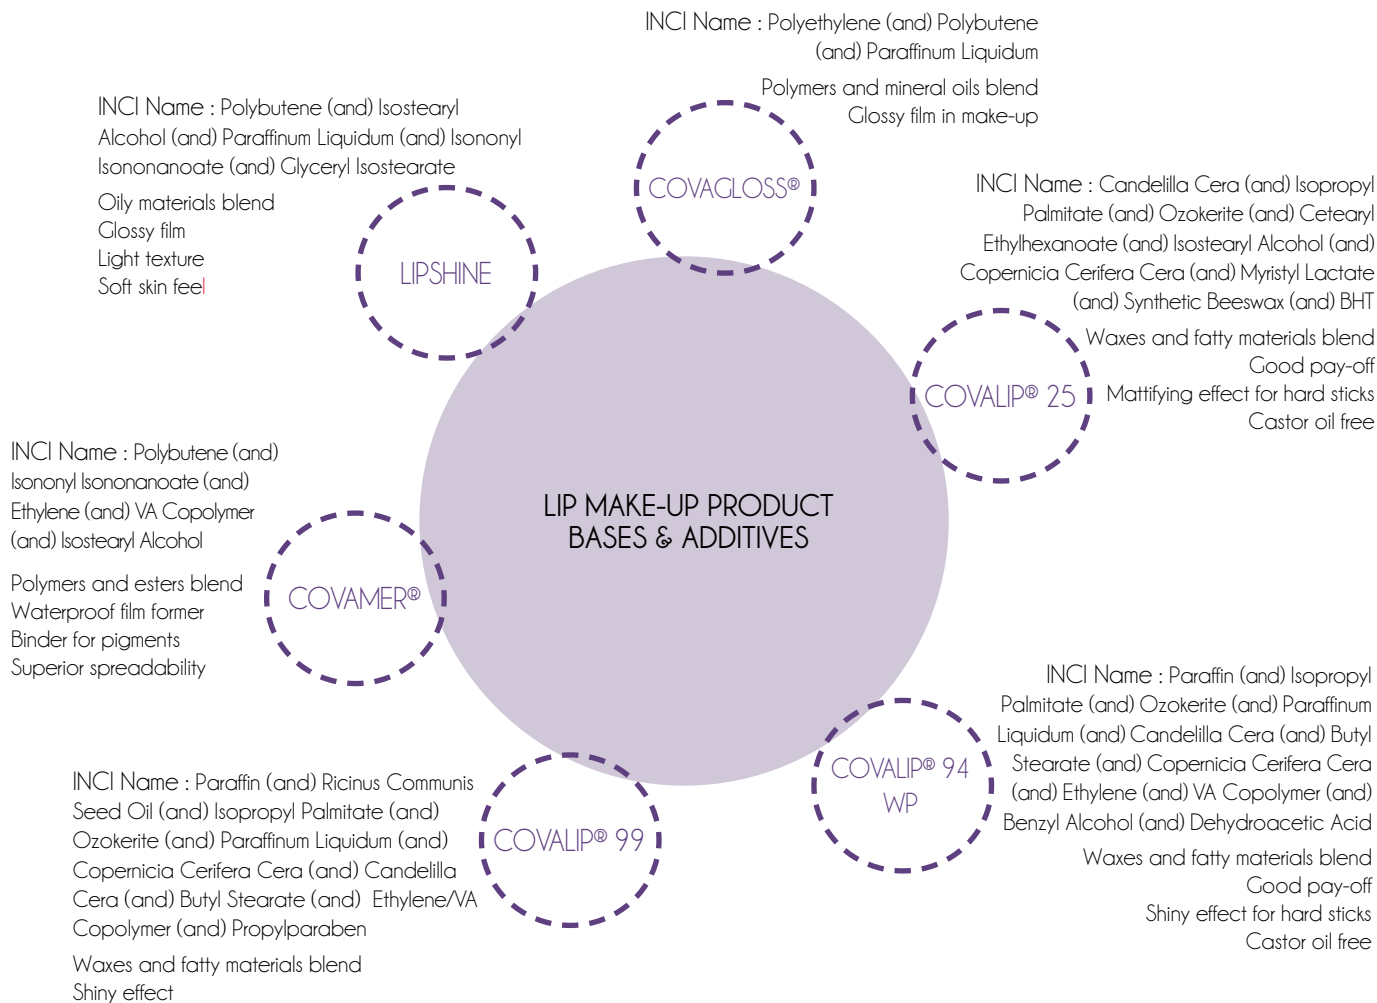

Sensient Cosmetic Technologies has developed a broad range of lipstick and lipgloss bases optimized for your development needs and designed to speed-up your formulation process.

Emulsion bases & Additives

Our range of emulsifiers gives the choice of making W/O, W/Si or O/W emulsions, in cold or hot process.

Natpure Feel-M Eco is a natural non-volatile silicone-like ingredient which can be used in unlimited applications ranging from skin care, hair care, hair color to make-up. It provides multiple properties like film-forming, conditioning effect, color booster, binder for pigments.

INCI Name : Polybutene (and) Isostearyl Isostearate (and) Pentaerythrityl Tetraistearate

Superior adhesiveness
For clear sticks and transparent lipglosses (in combination with Crystalwax)

INCI Name : Hydroxystearic Acid (and) Synthetic wax (and) Triisostearin (and) Polybutene (and) Pentaerythrityl Tetraistearate

Hard wax
For transparent and glossy sticks
Poured lipglosses and thick W/O emulsions

INCI Name : Ethylhexyl Hydroxystearate (and) Triethylhexyl Trimellitate (and) C30-45 Olefin (and) Hydroxystearic Acid

Hard wax
For poured lipglosses and thick W/O emulsions

INCI Name : Sucrose stearate
(and) Sucrose distearate
Natural O/W emulsifier

EMULSION BASES & ADDITIVES

INCI Name : Triethylhexanoin (and)
Cetyl PEG/PPG-10/1 dimethicone
(and) Polyglyceryl-2-isostearate (and)
Hexyl laurate

Non ionic self-emulsifying base
For stable W/Si or W/O emulsions
Suitable for cold process

INCI Name : Hydrogenated Polyisobutene

Synthetic squalane
Silky feel on the skin
Emollient
Pigment dispersing agent

Hair products
Excellent conditioning effect
Shiny result
Easy combing
Coloring effect booster
Limits color transfer

Pressed powder
Good binding properties

NATPURE® FEEL-M ECO

INCI Name : Isopropyl Palmitate (and)
Isostearyl Isostearate Octyldodecanol (and)
Octyldodecyl Myristate

Natural multifunctional non
volatile silicone-like film-former

BASES &
ADDITIVES

Actives

Sensient Cosmetic Technologies develops ingredients that focus on the consumer needs on the skin care market, such as whitening, cooling, anti-ageing or moisturizing. In addition to their efficacy, they contribute to the sensorial properties of the formulation.

Sensient continues to expand its already robust portfolio of cosmetic solutions while committing to operate in an ever more sustainable and socially ethical approach.

Objectivated botanical extracts

The Natpure® Xtra range of botanical actives are obtained using the patented PhytoClean™ process and have been selected to meet market demand for traceable, safe and standardized extracts for the formulation of clean cosmetic products.

• NATPURE® XTRA RANGE •

Highly concentrated botanical actives powered by PhytoClean™ process for clean label formulations and enhanced biological activity

Proven biological activity

NATPURE® XTRA
LONGEVITY

INCI Name : Camellia Sinensis Leaf Extract

Green Tea sourced from farms in the Nandi Hill region of Kenya.

Stimulates the skins defense against oxidative stress to maintain youthful looking skin.

NATPURE® XTRA
INTEGRITY

INCI Name : Ilex Guayusa Leaf Extract

Grown and harvested from small family farms in the Ecuadorian region of the Amazon rainforest.

Balances skin sensitivity and decreases inflammation to bring integrity and comfort for all skin types.

NATPURE® XTRA
VITALITY

INCI Name : Rosmarinus Officinalis Leaf Extract

Rosemary is an evergreen shrub that grows best in Mediterranean climates, and is ethically sourced from the Atlas Mountain region in Morocco.

Enhances the skins natural barrier function and fights external aggressors for skin that is protected and full of vitality.

Patented water process of extraction

PhytoClean™

By combining pressure and temperature, it is possible to improve the extraction capabilities of water. PhytoClean™ is based on sub-critical water, which allows the efficient extraction of a broad range of biologically active metabolites with no co-solvent use, limited energy consumption and preservative free.

Our analytical teams work on selecting the right biomasses and guide our extraction experts in order to obtain a consistent quality of the finished products, with guaranteed levels of active molecules and proven efficacy.

• Cosmetic Actives Ingredients •

PRODUCT NAME	INCI NAME	DESCRIPTION	BENEFITS
VEGETABLE CHARCOAL 	Charcoal Powder	Natural activated charcoal derived from European peatlands	PURIFYING Purifying & detoxifying benefits thanks to high absorbing properties Deep black color
COVASTEROL® 	Glyceryl isostearate (and) Isostearyl alcohol (and) brassica campestris (rapeseed) Sterols (and) Butyrospermum parkii butter (and) Candelilla cera	Blend of plant phytosterols with lanoline like emolliency and quick reduction of sebum production and pore size in only 7 days.	PORE REFINER Ideal for problem skin Pore refining Moisturization Hydration Skin comfort Skin smoothness Film forming
HYDROFACTEUR LC WP	Lactic acid (and) Urea (and) Hydrogenated starch hydrolysate (and) Hydrolyzed wheat protein (and) Glycerin (and) Allantoin (and) Butylene glycol (and) Triethanolamine (and) Sodium benzoate (and) Potassium sorbate	Complex based on alpha hydroxy acid paraben free extracted from apples	MOISTURIZING Natural skin moisturizing system Skin cells renewal processor Healing and soothing properties NMF substitute
NATPURE® AXP	Spirulina platensis extract (and) Dextrin (and) Sodium citrate (and) Sodium phosphate	Natural antioxidant based on spirulina extract	RADIANCE
FUCOSORB® WP	Laminaria Ochroleuca Extract (and) Sorbitol (and) Aqua [Water] (and) Sodium benzoate (and) Potassium sorbate	Red and brown seaweed extract for daily protection against environment aggressions	PROTECTION UV damage prevention Anti-inflammation Moisturizing Restructuring Firming effects
SENSIBRIGHT® DUAL WHITE WD	CI77891 (and) Synthetic fluorphlogopite (and) PEG-32 (and) Alpha arbutin (and) Aqua (and) Glycerin (and) Glycyrrhiza glabra (licorice) root extract	Ultra-white titanium dioxide coated with an hydrophilic polymer containing alpha arbutin and licorice	WHITENING Instant and long term whitening effect Moisturizing Illuminating effects Instant and long term whitening effect
LIPOFIRM LCW® WP	Centella Asiatica Extract (and) Caffeine (and) Algae Extract (and) Carnitine (and) Salicylic Acid (and) Panthenol (and) Disodium Rutinyl Disulfate (and) Triethanolamine (and) PEG-8 (and) PEG/PPG-18/18 Dimethicone (and) Sorbitol (and) Propylene Glycol (and) Sodium Benzoate (and) Potassium Sorbate	Mixture of natural and synthetic active ingredients	FIRMING Slimming effect Lipolytic and draining properties Anti-redeposition
COVAFRESH® IV	Menthyl lactate (and) PPG-26 Buteth-26 (and) PEG-40 hydrogenated castor oil	Water soluble menthyl lactate	COOLING Skin cooling effect without MENTHOL SMELL
COVAFRESH®	Menthyl lactate (and) PPG-26 Buteth-26 (and) PEG-40 hydrogenated castor oil	Water soluble menthyl lactate	COOLING Skin cooling effect with slight menthol smell
